

Briscoe Architectural Conservation

Briscoe Architectural Conservation (BAC) is a historic preservation contracting and consulting company. Our services include restoration carpentry and masonry, LiDAR documentation, and drawing development, Historic Structure Reports, National Register nominations and Historic Preservation Tax Credit applications. BAC was founded in 1991 by Frank Briscoe. While most of our work is in the Texas-Mexico borderlands, we work throughout the United States and at select international projects. For more information, please visit our website at briscoeconservation.com.

We are looking for skilled craftsmen and women in a variety of areas of architectural conservation, including:

- restoration carpentry
- restoration masonry
- LiDAR documentation
- Historic Structure Reports
- National Register nominations and Historic Preservation Certification Applications
- dendrochronology
- mortar analysis

Compensation

Employees are compensated at competitive rates, based on skill and experience. We also offer travel and housing allowances when projects require travel.

We're an equal opportunity employer. We drive to have a diverse and supportive workplace.

If interested, please send a description of your interests and brief resume to admin@briscoeconservation.com.
